Q.7 Answer the following questions. (4x2=8)

1. What special features do turtles have to help them survive in water?

Turtles have webbed feet or flippers to swim, a hard shell to protect themselves, and they can hold their breath underwater for a long time. These features help them survive in water.

2. Why are trees important to us and the environment?

Trees are important because they give us oxygen to breathe, food to eat, and wood to use. They also keep the air clean, give shade, and help bring rain. Trees provide shelter for birds and animals and help keep the soil strong and healthy.

3. What can you do to protect nature in your school or neighbourhood?

We can protect nature by following these steps:

- **Planting trees and watering them regularly.**
- **Throwing waste only in the dustbins and keeping the area clean.**
- **Saving water and electricity by turning off taps and switches when not in use.**
- **Saying no to plastic and using eco-friendly bags.**
- **Reusing and recycling old items whenever possible.**
- **Spreading awareness among friends and neighbours about protecting nature.**

4. Name a festival in your area where people worship animals or plants.

Govardhan Puja is celebrated in North India after Diwali. Cows and nature are worshipped to thank them for providing food and support.
